Referral re:

I am referring Miss Xanthe Willson-Laidlaw to you for psychology support. She is a lovely active 9 year old girl who has sadly lost her mother to metastatic cancer in August of last year.

She has been having trouble with emotional regulation. She has already seen our paediatrician who does not believe she has an attention disorder. The paediatrician believed that Xanthe would benefit from psychology support for grief over the loss of her mother.

I am referring her for this under the attached MHCP for 6 sessions of psychology. I would appreciate if you could write back to me near the end of her treatment. If she would benefit from additional support I can assign further sessions at her MHCP review.

Yours
