Referral re:

I am referring Mstr Noah Mayo to you under the attached MHCP. He is a 12 year old boy with symptoms of depression. His DASS 21 score was significant for depression and stress (see the MHCP).

He has 2 loving and involved parents and 2 younger siblings who are well. His parents did go through a rough patch a couple years ago, but they have since built back a strong relationship. it was around the time of the marital disharmony that his behaviours started.

I have also referred him to our paediatrician for investigation of a behavioural or attention disorder, although I am thinking this is less likely.

I am referring him for 6 sessions of psychology under a GP MHCP.

Regards,

Dr Andrew Taylor
